

Start your energy-saving journey at home

Residential Rebate Program

Choosing energy-efficient equipment has never been easier, thanks to CenterPoint Energy's Residential Rebate Program. You can earn rebates on a variety of energy-saving equipment and improvements, including heating equipment, smart thermostats and insulation upgrades.

Easy steps to save

- 1. Find a contractor.** Some products must be professionally installed (except for thermostats, which may be self-installed).
- 2. Make upgrades.** Install new, qualifying products or services (see reverse) before December 31, 2024.
- 3. Start saving.** The fastest way to earn your rebate dollars is to apply online at [CenterPointEnergy.com/SmartSavings](https://www.CenterPointEnergy.com/SmartSavings). Applications are also accepted via mail, email or fax. Applications must be submitted within 60 days of installation.

Who is eligible?

Rebates are available for CenterPoint Energy residential customers who are replacing existing equipment or installing qualifying products as part of a newly constructed home.* To verify eligibility, please speak to a program representative at **866-240-8476**.

Get instant discounts

Reduce your immediate out-of-pocket cost by receiving your rebate at the time of purchase. Instead of applying for the rebate and receiving a check, your contractor will deduct the rebate from your invoice at the time of installation. Ask your contractor if they offer instant discounts on available energy-saving products and services, such as:

- Furnaces
- Smart thermostats
- Boilers
- Insulation

Start saving

Visit [CenterPointEnergy.com/SmartSavings](https://www.CenterPointEnergy.com/SmartSavings) for more information or to apply for your rebate.
